

Privacy Policy

Last updated: [DATE]

This Privacy Policy explains what information **[LEGAL ENTITY NAME]**, [a private limited company registered in India / an individual proprietorship] with its registered address at **[FULL ADDRESS]** ("Hamme", "we", "us"), collects when you use the Hamme mobile app, the Hamme response pages on the web, and related services (together, the "Service"), and what we do with it.

We are the data controller (data fiduciary) for this information. Contact us at **[PRIVACY EMAIL]**.

This policy covers two different groups of people:

- **Account holders** — people who install the app and create a Hamme account.
 - **Responders** — people who open someone's Hamme link and choose a reaction on the web without installing the app. Section 3 is written for you.
-

1. Information We Collect From Account Holders

Information you give us when you sign up

- Your **name** (as you enter it, displayed to other users)
- Your **date of birth**, used to confirm you meet our minimum age and to apply age-appropriate restrictions
- Your **profile photo**, which you upload
- Optionally, your **[Instagram and/or Snapchat] username**, if you choose to add it

We do not ask for your email address, phone number, or postal address at signup. If you email our support address, we will have your email address from that message.

Information generated by your use of the Service

- Your **share link or share code**
- **Reactions you receive**, including the reaction chosen and whether the sender has a Hamme account
- **Reactions you send** to other users
- **Matches**, meaning cases where you and another user chose the same reaction

- App activity such as screens opened, features used, cards viewed, and session timestamps

Information collected automatically

- Device and app data: device model, operating system version, app version, language, and time zone
- **IP address** and approximate location derived from it (country or region level; we do not collect GPS location)
- Log and diagnostic data, including crash reports and error traces
- Identifiers used for install attribution and to link a shared link to the resulting install

Purchases

If you buy a paid feature, Apple or Google processes the payment. We receive confirmation that a purchase or subscription is active. **We never receive your card number or bank details.**

Notifications

If you allow notifications, we store a push token so we can tell you when you have new reactions.

2. How We Use This Information

Purpose	Information used
Create and run your account	Name, date of birth, photo, handle
Show your profile on your share page	Name, photo
Deliver reactions and detect matches	Reactions, share code, account IDs
Confirm you meet the minimum age and apply age restrictions	Date of birth, age signals from app stores
Send you notifications you asked for	Push token
Keep the Service safe: detect abuse, spam, fake accounts, and manipulated reactions	Device data, IP address, activity, reports
Moderate content, including reviewing profile photos and handling reports	Photo, reports, account data
Fix bugs and improve the app	Diagnostic and activity data
Measure which shared links lead to installs	Attribution identifiers, device

Purpose	Information used
	data
Comply with law and enforce our Terms	Any of the above, as necessary

Where the law requires a legal basis, we rely on: performance of our contract with you (running your account and delivering reactions), our legitimate interests (safety, abuse prevention, improving the Service), your consent (optional handle, notifications, optional analytics where required), and legal obligation.

We do not use your information for advertising, and we do not sell or share it for cross-context behavioural advertising.

3. If You Responded to Someone's Link Without Installing the App

If you opened a Hamme link and chose a reaction on the web, here is exactly what happens.

What we collect from you:

- The **reaction you chose** and the link it was given through

- Your **IP address**, device type, browser type, and the time of your response
- A **cookie or browser identifier**, so the same person cannot repeatedly submit reactions to one link, and so your response can be connected to your account if you later install the app

What we do with it: we deliver your reaction to the person whose link you used, and we use the technical data to prevent abuse and duplicate submissions.

What the recipient sees: the reaction you chose, shown **without your name**, because we do not know who you are. If you later install the app and create an account, your name and photo become attached to the reaction you already sent, and the recipient will then see who it was from. **If you do not want to be identified, do not install the app after responding.**

We do not collect your name, photo, email, or social handle on the web. We do not build an advertising profile of you.

To have your response and associated technical data deleted, email **[PRIVACY EMAIL]** with the approximate date and the link you responded to, or use **[WEB DELETION URL]**.

4. What Is Visible to Others

- **Your name and profile photo are public.** They appear on your Hamme share page, which anyone with your link can open without an account. Do not upload a photo you would not want seen publicly.
 - **Your date of birth is never shown** to other users.
 - **Your social handle** is shown only if you added one, and only where the app indicates.
 - **A reaction you send is not revealed** to the recipient unless both of you chose the same reaction. We do not tell anyone that you chose a reaction they did not also choose.
 - **Reactions you receive are private to you.**
-

5. Who We Share Information With

We do not sell your personal information. We share it only as follows.

Recipient	What they receive	Why
[Cloud hosting provider, e.g. Google Cloud / AWS / Supabase]	All stored data	Hosting and databases

Recipient	What they receive	Why
[Attribution provider, e.g. Branch]	Device and install identifiers, IP address	Linking a shared link to the resulting install
[Analytics and crash reporting, e.g. Firebase / Crashlytics]	Device data, activity events, crash logs	Diagnostics and product analytics
[Push provider, e.g. Firebase Cloud Messaging]	Push token	Sending notifications
[Moderation or image-scanning provider, if used]	Profile photos	Detecting objectionable content
Apple, Google	Purchase and subscription status	Processing payments

Recipient	What they receive	Why
Law enforcement or regulators	Only what is legally required	Legal obligation, safety
An acquirer	Stored data	Merger, acquisition, or asset sale, subject to this policy

Service providers may process data only on our instructions and may not use it for their own purposes.

If you share your Hamme link on a social platform, that platform's own privacy policy governs your post there. We do not control it.

6. How Long We Keep Information

Data	Retention
Account data (name, date of birth, photo, handle)	Until you delete your account

Data	Retention
Reactions and matches	Until you delete your account, or [12] months, whichever is sooner
Web responder data (Section 3)	[90] days
Diagnostic and crash logs	[90] days
Abuse, ban, and moderation records	[12] months after account deletion, to stop banned users returning
Records we must keep by law	As long as the law requires

After an account is deleted, we delete or irreversibly anonymise the data above within **[30] days**, except where a longer period is listed.

7. Deleting Your Data

In the app: Settings → Delete Account. This removes your account and the data in Section 6.

Without the app installed: go to **[WEB DELETION URL]**, or email **[PRIVACY EMAIL]** from a device or

address we can verify. We will confirm and act within **[30] days**.

You do not need to reinstall the app to request deletion.

8. Your Rights

Depending on where you live, you may have the right to access the information we hold about you, correct it, delete it, obtain a portable copy, object to or restrict certain processing, withdraw consent, and not be discriminated against for exercising these rights.

- **India (DPDP Act, 2023):** you may access, correct, and erase your data, nominate another person to exercise your rights, and raise a grievance. Our Grievance Officer is **[NAME]**, reachable at **[GRIEVANCE EMAIL]**. If unresolved, you may complain to the Data Protection Board of India.
- **EU/UK (GDPR):** you may also lodge a complaint with your local supervisory authority.
- **California and other US states:** you may exercise the rights above by contacting us. We do not sell personal information or share it for cross-context behavioural advertising, and we do not offer financial incentives for data.

To exercise any right, email **[PRIVACY EMAIL]**. We will verify your request and respond within the period the applicable law allows.

9. Children and Teenagers

The Service is for users aged **13 and over**. We do not knowingly collect personal information from children under 13. If we learn that we have, we delete the account and its data.

In some jurisdictions, Apple and Google are required to verify a user's age and obtain verifiable parental or guardian consent before a person under 18 downloads the app or makes a purchase. Where we receive an age category or consent signal from an app store, we may use it to confirm eligibility, to limit features, or to decline service. We use any such signal only for that purpose and delete it once used, where the law requires.

If you are a parent or guardian and believe your child has provided information to us, contact **[PRIVACY EMAIL]** and we will review and remove it.

10. Security

We protect information using encryption in transit (HTTPS/TLS), access controls limiting who on our side can reach production data, and [encryption at rest / regular backups / other measures you actually have]. No system is completely secure, so we cannot guarantee absolute security. If a breach affects your personal data, we will notify you and the relevant authorities where the law requires.

11. International Transfers

We are based in India, and our users include people outside India. Your information may be stored and processed in **[India / the United States / other countries where our providers operate]**, where data protection laws may differ from those where you live. Where required, we use appropriate safeguards such as standard contractual clauses with our providers.

12. Changes to This Policy

We may update this policy. If a change materially affects how we handle your information, we will notify you in the app or by a notice on our website at least **[14]** days before it takes effect. The "Last updated" date above always reflects the current version.

Continued use after a change takes effect means you accept it.
